

KALBURGI CEMENT PRIVATE LIMITED

CORPORATE SOCIAL RESPONSIBILITY

ANNUAL REPORT- 2021

Solid Waste Management

Kalburgi Cement Private limited in association with association with CHF India Foundation has initiated a operation of community waste management in alignment with Indian Government's clean and green cities, towns and villages. The objective of this project is to make our villages clean and green.

A part of inorganic waste generated in these villages will form input in the process of cement manufacturing for firing the Kiln as Alternate Fuel and Raw Material (AFR) as an initiative to save non-renewable energy resources. Organic waste is being subjected to vermicomposting resulting in availability of manure for backyard kitchen gardens.

The objective of project is to make the adopted villages zero waste, which would result in clean and healthy environs enabling the community to contribute better to the society. The objective of the project is to make these villages clean and green with an overall perspective of health well-being of the community. The project is being implemented in two village **Chatrasala and Kherchkhed.**

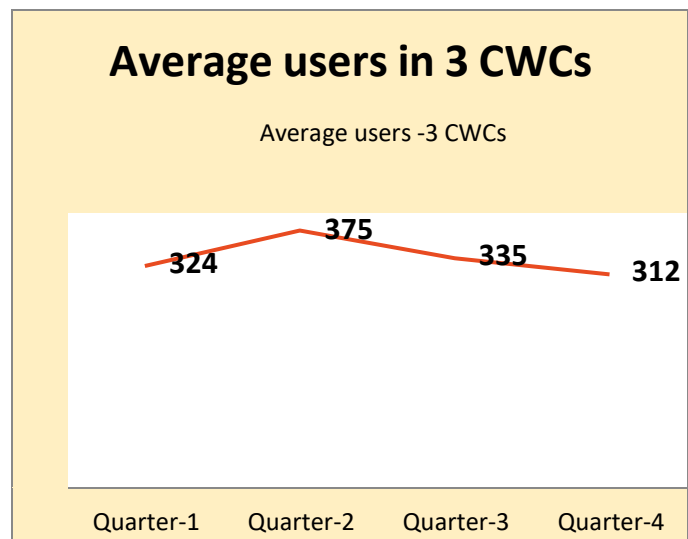

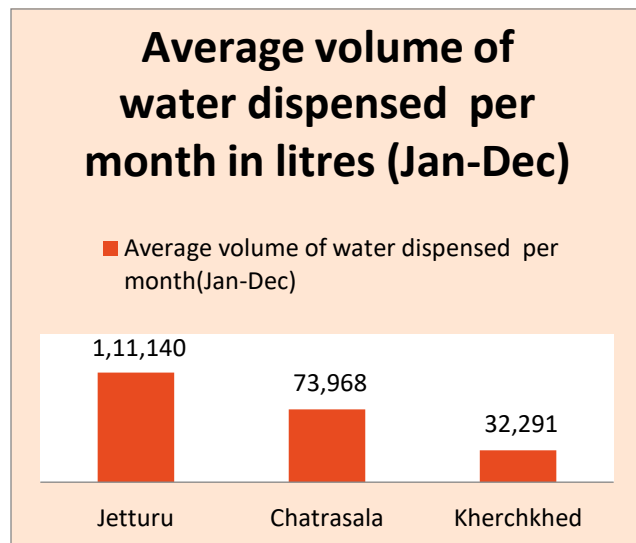

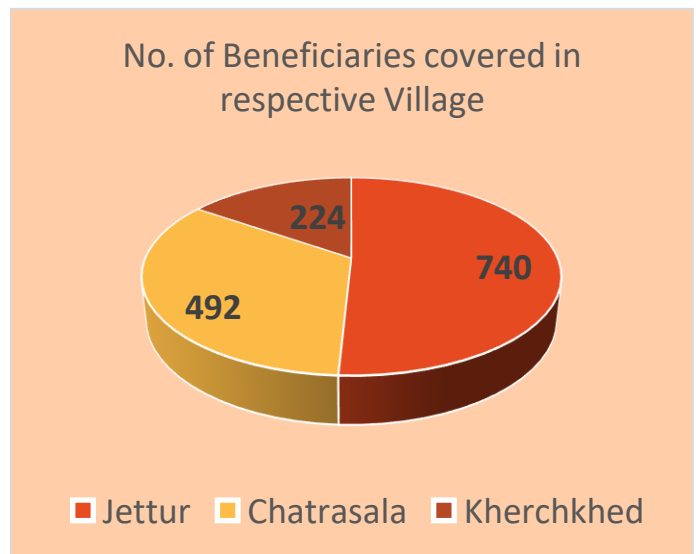

330.62 tons of waste is recycled since project incepted in 2018 till December 2021.

Safe drinking water

03 Reverse osmosis safe drinking water plants were set-up in the 3 villages Chincholi taluka of Kalaburgi District to ensure safe drinking water for the villagers of neighborhood. These RO Plants are handled by Naandi Foundation, which delivers safe and clean drinking water across the country. The objective of the whole program is to orient the villagers towards safe and clean drinking water sessions conducted periodically.

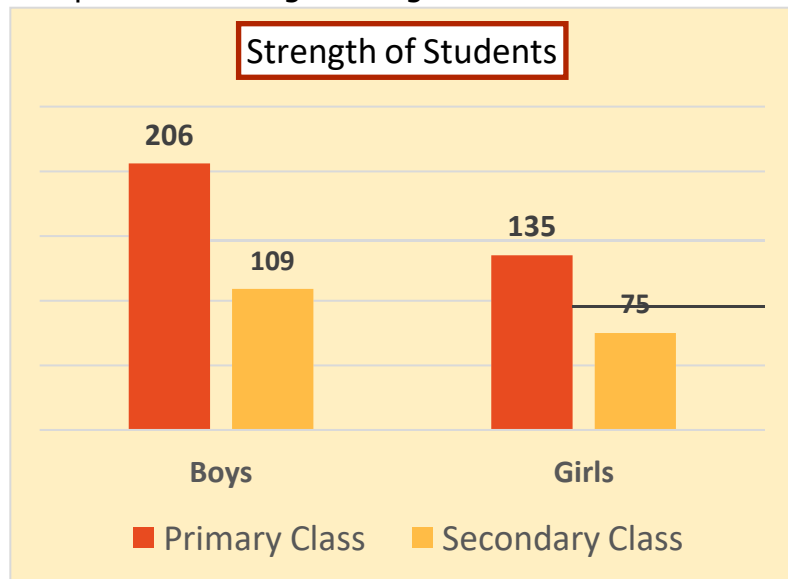

Our implementing partner conducts intensive campaigns to increase the awareness among the people and build & instill the sense of ownership within the community on safe drinking water. Further, community connect programs are held in schools and colonies to enlighten the people on safe drinking water and on hand wash.

Quality Education for Future Generation.

Vicat DAV Vidya Mandir, Chatrasala established in the year-2013 with a meager strength inside the residential Asharay Colony of Kalburgi Cement Pvt. Ltd in 2017. It has shifted to a new permanent school building which has well equipped Composite, Maths and Computer labs along with digital boards which can be utilized up to XII standard.

It is affiliated to CBSE-New Delhi. Three X standard batches attended for the AISSE and they came out with excellence and have brought laurels to the school and parents as well. They proved their metal at Kalaburagidistrict level at their best.

At present, we have **525 students** running with a single section of each class under the guidance of 19 able Teachers.

20 kids from Government Primary School, Chatrasala are provided free education in the School.

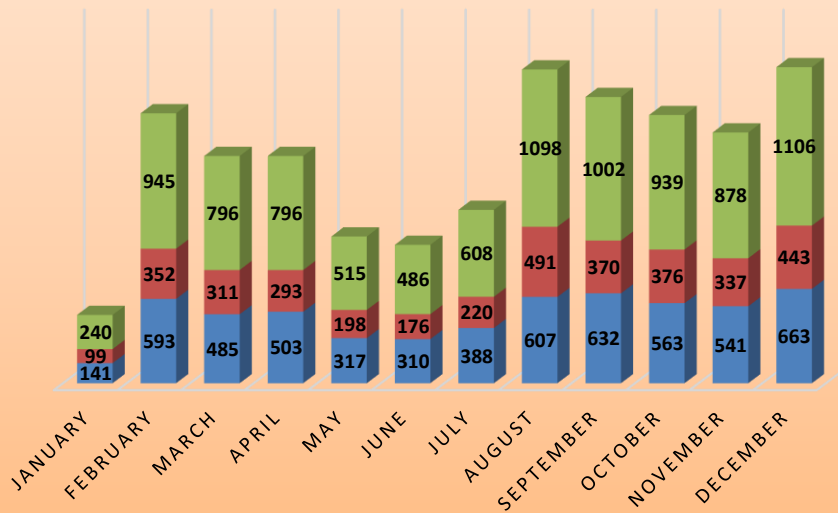

Apart from their regular academic excellence, we impart the culture and moral values to the students with a plethora of events to enhance their inherent potential, which leads to holistic development of the wards. There are some significant events like Teachers Day, Doctors Day, Yoga Day, Geetha Jayanthi, Havansotav, Children’s Day, and Mathematics Day... are celebrated to inculcate Vedic culture and enlighten with the days importance along with traditional festivals like Dewali , Dusshera...and also National Festivals.

Primary Health Centre at Chatrasala

MONTHLY WISE PATIENT FLOW IN HEALTH CENTRE

■ Male ■ Female ■ Total

Primary Health Center

A primary health center is functioning at Chatrasala village with a dedicated doctor attending to the community's health issues. On an average, 25-30 patients visit the health center every day. Total 9309 consultations took

place between (January December) 2021. This

Health center is operated for 4 hours daily. People from the surrounding plant periphery access the health camp facility.

Cement Concrete roads in Kherchkhed village

500 meters of cement road connectivity was established in the Kherchkhed village. Bye lanes in the village were cemented as these roads get inundated during monsoon. The roads have reduced the water logging & mosquito breedi breeding in the village.

COVID -19 support

1. Supported by contributing 25 oxygen concentrators for surrounding hospitals in the plant area worth Rs. 25 lacs
2. Supported Government hospital, Chincholi by providing material for COVID-19 ward encompassing beds, electrical fixtures, air-conditioners etc., We have also done civil work in the ward. The entire support is to the tune of Rs.20 lacs.
